

Mobile Time Collection

# AutoTime® Mobile For BlackBerry™

BlackBerry™ is the leading provider of business mobile solutions, offering innovative applications that make it easier for users to manage daily activities and communicate effectively. In today's competitive business environment, it is crucial to give your mobile workforce the tools needed to be successful. Kaba is leading the trend to improve efficiencies for its customers with AutoTime® Mobile, a time and data collection solution designed for the BlackBerry platform.

**Your supervisors** are always on the go whether out in the field, managing a remote project, or on the way to their next client meeting. AutoTime Mobile allows supervisors the capability to review and approve time records in real-time without having to be at a PC. No matter where they are, their employee's time record is available immediately at the touch of a button.

**For the elapsed or exception employee,** there are no more excuses for late timecards while out of the office or on the road. AutoTime Mobile allows employees to view their time card, post new events, modify existing events, and sign their time card right from their BlackBerry.

**The hourly employee will benefit from** AutoTime Mobile by being able to conveniently enter real-time labor transactions and clock in or out, just as if they were at an actual time clock. Other functionalities include viewing accrual balances, requesting time off, and viewing open jobs all right at their fingertips.

Collecting and editing timekeeping data from anywhere, at any time, can provide an efficient means of managing and reporting time for the remote employee. Simple navigation is supported by standard BlackBerry functionality and in just a few clicks, you are back to the critical task at hand. Kaba's AutoTime Mobile software solution continues to provide easier ways for you to manage your time and increase productivity.

**Kaba Workforce Solutions**
