

B-COMM[®] for Microsoft Dynamics AX[®]

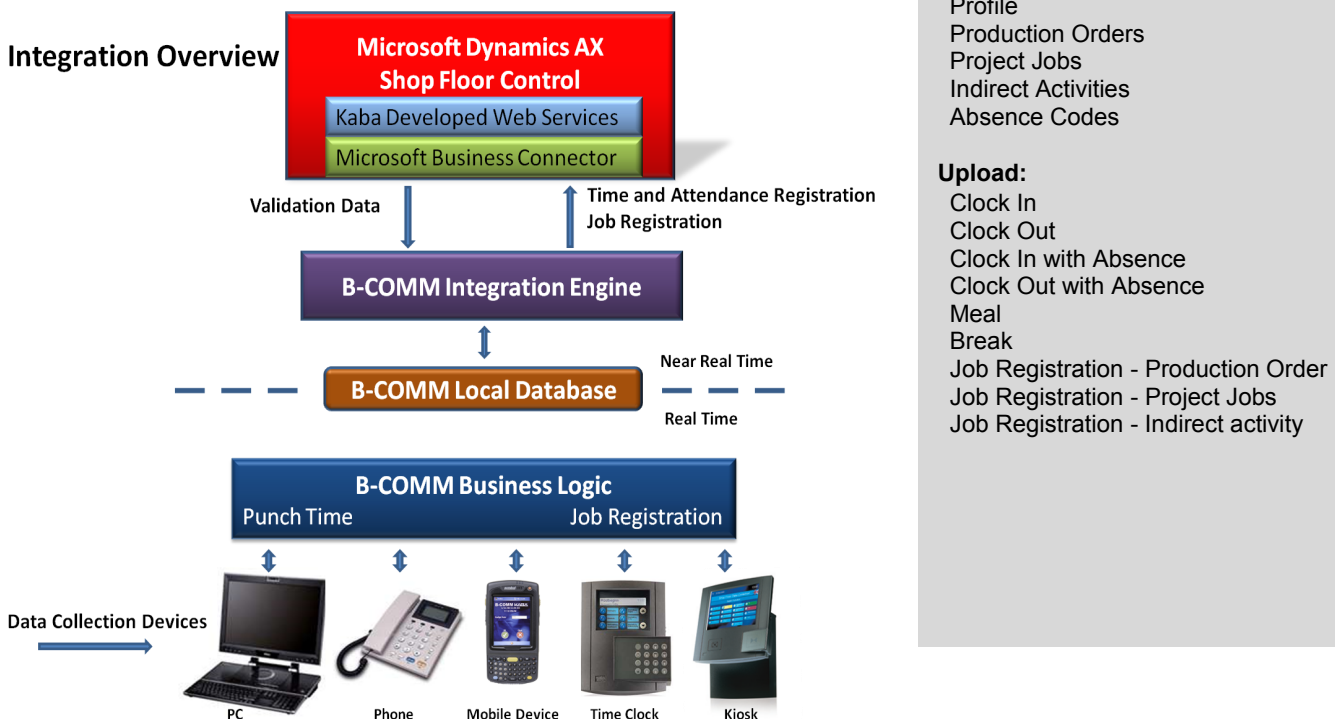

The challenge facing every industry is how to maximize resources, increase efficiencies, and reduce costs. B-COMM, a robust, validated communication software application, links the Microsoft Dynamics AX Shop Floor Control module to a wide range of data collection devices. B-COMM for Microsoft Dynamics AX provides secure, seamless bi-directional communication via standard API's. This innovative data collection process can result in substantial savings by controlling the environment in which employees enter their time while providing real-time visibility of critical information to frontline managers. Accurate time and attendance data can simplify decision making, maximize resources, increase efficiency, and reduce costs.

B-COMM for Microsoft Dynamics AX is a scalable enterprise class application. It offers an intuitive interface that facilitates easy implementation and remains operational, even if your ERP is not available.

Contact Kaba Workforce Solutions and find out how we can help you conquer time.

Integration Overview

BENEFITS

- Scalable, configurable enterprise class application
- Real-time visibility of information empowers decision making
- Flexible front end streamlines and automates data entry
- Automated data collection and real-time validation ensures accuracy
- Customizable user interface supports user acceptance
- Offline data collection and automatic synchronization ensures high availability
- Supports a wide range of data collection methods and devices
- Remains operational even when the ERP is unavailable
